Statement of Qualifications

Background

Established in 2014, P3 Safety Solutions provides services throughout the Southwestern United States as a premiere training and consulting firm that offers a range of occupational safety and health services. P3 Safety Solutions is renowned for our expertise in training, occupational safety and risk evaluation, and technical writing services for the construction, telecommunication, and infrastructure industries.

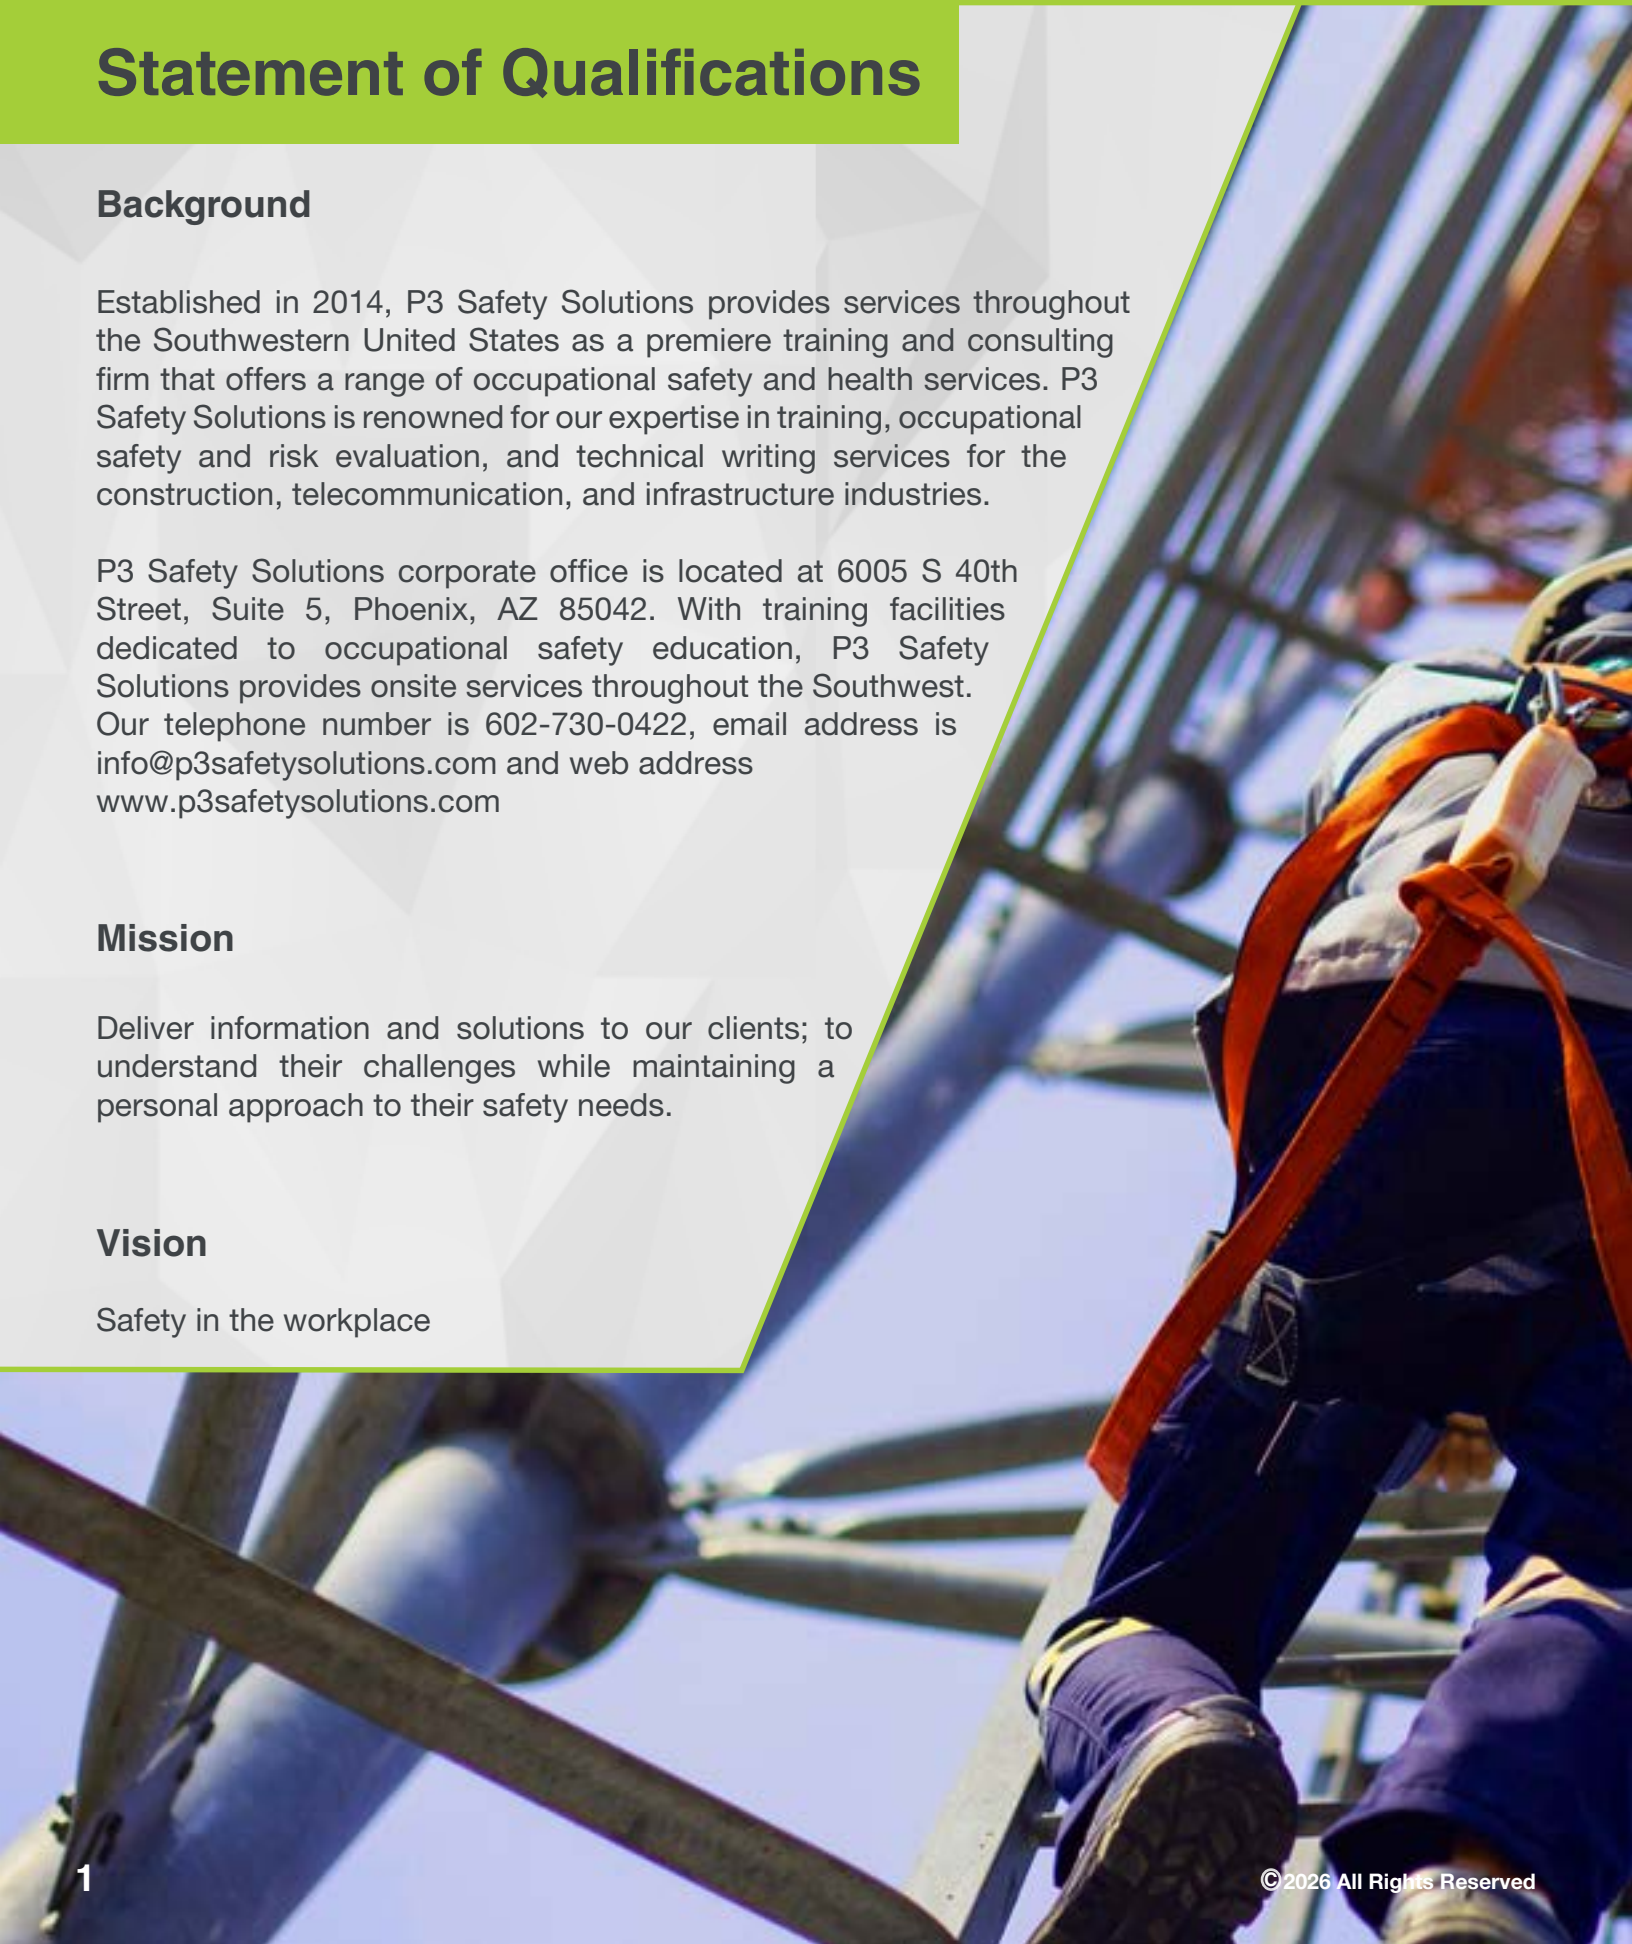

P3 Safety Solutions corporate office is located at 6005 S 40th Street, Suite 5, Phoenix, AZ 85042. With training facilities dedicated to occupational safety education, P3 Safety Solutions provides onsite services throughout the Southwest. Our telephone number is 602-730-0422, email address is info@p3safety.com and web address www.p3safety.com

Mission

Deliver information and solutions to our clients; to understand their challenges while maintaining a personal approach to their safety needs.

Vision

Safety in the workplace

Expertise

P3 Safety Solutions provides professional services in Construction, Telecommunications, Infrastructure and General Industry. Our professionals are tenured, hold recognized degrees, designations, and credentials with the experience and qualifications to professionally train employees and change workplace hazards for your organization. We at P3 Safety Solutions pride ourselves on partnering with the absolute best organizations that support our vision of safety in the workplace, and are devoted to professional development and regularly attend professional development meetings and conferences for the Arizona Governmental Safety Association, National Utility Contractors Association, AZ Wireless Association, National Association of Tower Erectors, American Society of Safety Professionals, National Safety Council, AZ Water Association, California Association of Water Agencies and Nevada Water Environment Association.

Consulting Services

Our Safety professionals have decades of education and work experience to give our clients the best approach on building a world class safety culture. As a partner, P3 Safety Solutions provides a variety of technical services to provide evaluation of written materials, training program tracking and site risk assessments. With professional retention services available; employers can focus our services where needed most.

Training Services

Delivery:

Training delivery will be instructor led, either in person, or through live remote video. P3 Safety Solutions follows the guidelines put forth in the *ANSI/ASSP Z490.1-24 "Criteria for Accepted Practices in Safety, Health and Environmental Training"*, as well as OSHA training guidelines.

Instructors:

Our instructors are industry safety professionals, and are qualified to deliver course curriculum and issue certificates of completion for the student.

Remote Learning:

Some of our courses can be delivered through remote video conference. P3 Safety Solutions uses the absolute best remote cameras and technology to provide a unique online learning experience with products and live demonstrations that rival in-person learning.

Certificates:

All Certificates will be issued to the attendee, or attendees' representative, upon successful completion of the course. Certificates will be delivered electronically in soft copy and in accordance with *ANSI/ASSP Z490.1-24*.

Class Sizes:

There is no minimum class size. The maximum class size varies from 10 up to 24 attendees based on the course. (Check course size listed on each course) Class Pricing is all inclusive. Contact us for more information.

Training Center:

P3 Safety Solutions operates out of the ****Phoenix Safety Training Center**. More on pages 13 and 14.

Bechtel, Kiewit, EPCOR, Ericsson, Fujitsu, PCL, Pauley Construction, International Towers, Enertech Resources, Mastec, High Desert Communications, Hensel Phelps, ProEm National Event Services, ICON Electric

Available Courses for 2026

Aerial Lift / MEWP (Mobile Elevated Work Platforms)

Delivery: In Person

Duration: 4 Hours Awareness/ Refresher
8 Hours Initial Operator

Class Size: 16 attendees max.

Certificate: 2 year expiration

Description: Training for either vehicle mounted or mobile elevated, rotating and working platforms. This class gives the attendee the information needed for inspection, and safe operation, of the equipment *OSHA 1910.67 1926.453 ANSI A92.2, 92.22, 92.24.*

Basic Rigging**

Delivery: In Person at Phoenix Safety Training Center

Duration: 8 Hours

Class Size: 16 attendees max.

Certificate: 2 year expiration

Description: Mastering the art of secure load handling is critical for site safety and operational flow. This program provides an in-depth exploration of basic to intermediate rigging and signaling applications, specifically designed to empower personnel with the skills needed for safe field execution. Participants move beyond basic concepts to learn precise tension calculations, hazard identification, and rigorous prevention techniques that align with modern safety requirements.

Competent Rigger & Capstan Hoist Operator (Telecom)**

Delivery: In Person at Phoenix Safety Training Center

Duration: 16 Hours

Class Size: 10 attendees max.

Certificate: 2 year expiration

Description: This course offers a blend of theory and practical training, guided by an instructor. Upon finishing the course, participants will earn certification as a Competent Rigger, in line with ANSI A 10.48 standards. The primary goal is to provide telecommunications workers with the necessary skills and equipment for effective rigging and signaling at telecom sites.

Competent Elevated Worker Safety & Rescue Training** (a.k.a. Competent Tower Climber & Rescue)

Delivery: In Person at Phoenix Safety Training Center**

Duration: 24 Hours

Class Size: 10 attendees max.

Certificate: 2 year expiration

Description: This three-day course is designed to equip workers across industries with the knowledge and skills necessary for competent fall protection, advanced elevated work techniques, and industrial rescue operations. The program meets the NATE CTS (Climber Training Standard)

curriculum and aligns with ANSI Z359, OSHA 1910, OSHA 1926, ANSI/ASSP A10.48-2023, and rope access techniques and guidelines, ensuring compliance with the highest safety protocols. Participants will earn a two-year certification upon successful completion, showcasing their expertise in fall protection hazard identification, elevated work, and rescue operations.

Confined Space Entry for Entrants, Attendants & Supervisors** (available in Spanish)

Delivery: In Person

Duration: 4 Hours - Awareness
8 hours - Competent Level

Class Size: 24 attendees max.

Certificate: 2 year expiration

Description: The attendee for this course will be able to evaluate a space to determine if it is classified as a confined space, or a permit required confined space. The methods of hazard control and the roles and responsibilities needed for permit confined space entry. A hands-on demonstration of PRCS entry and rescue techniques for non-entry rescue of the entrant. *OSHA 1910.146, 1926.1200, ANSI Z117, NFPA 350*

Confined Space Entry with Rescue Techniques**

Delivery: In Person

Duration: 16 Hours

Class Size: 10 attendees max.

Certificate: 2 year expiration

Description: The attendee for this course will be able to evaluate a space to determine if it is classified as a confined space, or a permit required confined space. The methods of hazard control and the roles and responsibilities needed for permit confined space entry. A hands-on demonstration of PRCS entry and rescue techniques for non-entry rescue of the entrant. *OSHA 1910.146, 1926.1200, ANSI Z117, NFPA 350*

Control of Hazardous Energy (LOTO)**

Delivery: In Person
 Duration: 4 Hours
 Class Size: 24 attendees max.
 Certificate: 2 year expiration
 Description: Authorized workers performing service or maintenance on machinery and equipment may be exposed to injuries from the unexpected energization, startup of the machinery or equipment, or release of stored energy in the equipment. The Lockout/Tagout standard requires the adoption and implementation of practices and procedures to shut down equipment, isolate it from its energy source(s), and prevent the release of potentially hazardous energy. *OSHA 1910.147*

ES&H Leadership Workshop**

Delivery: In Person
 Duration: 8 Hours
 Class Size: 24 attendees max.
 Certificate: 2 year expiration
 Description: The purpose for this group workshop is to establish ES&H leadership abilities for supervisory and management staff. The workshop is designed to provide the participants the tools and techniques used to reduce incidents, behavior-based safety management, and their respective EH&S roles and responsibilities. The primary attendees should include foremen, general foremen, and superintendents. Another non-manual personnel may attend at the direction of their manager.

Fall Protection and Compliance** (available in Spanish)

Delivery: In Person
 Duration: 4 hours - Awareness
 8 hours - Competent
 Class Size: 24 attendees max.
 Certificate: 2 year expiration

Description: The class provides understanding of the fall protection requirements and regulations from the OSHA General Industry and Construction Standards. This is for the competent person who may be evaluating the differences of fall restraint and fall arrest in the workplace, includes Ladder Safety. *OSHA 1926.21, 1926.503 ANSI 359*

Fall Protection with Principles for Climbing & Rescue** (available in Spanish)

Delivery: In Person

Duration: 16 Hours

Class Size: 10 attendees max.

Certificate: 2 year expiration

Description: This comprehensive training course is designed for competent persons responsible for evaluating and implementing fall protection systems. Participants will gain in-depth knowledge of identifying fall hazards, inspecting and installing fall protection equipment, and developing compliant fall protection plans. Day two focuses heavily on practical exercises, including equipment inspection, ladder safety, anchorage setup, personal fall arrest system usage, and rescue drills to ensure real-world readiness and compliance. *OSHA 1926.21, 1926.503 and ANSI Z359*

Front Loader and/or Backhoe

Delivery: In Person

Duration: 8 Hour Awareness/ Refresher

16 Hour Initial Operator

Class Size: 4 people per vehicle/ 16 attendees max.

Certificate: 2 year expiration

Description: This is operator training for tractors with a front loader bucket and rear excavation arm, commonly known as a Backhoe. This course covers the equipment function, safe movement, loading and unloading and operator controls. The attendee will perform practical operation of the equipment in preparation for production. *OSHA 1926.600, 1926.602 1926.604*

Hazardous Communication with GHS**

Delivery: In Person

Duration: 4 Hours

Class Size: 24 attendees max.

Certificate: 2 year expiration

Description: The Hazard Communication Standard (HCS) is now aligned with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). This class provides a common and coherent approach to classifying chemicals and communicating hazard information on labels and safety data sheets. *OSHA 1910.1200, 1926.59 Curriculum*

HAZWOPER**

Delivery: In Person
 Duration: 8 hours - Refresher
 24 hours - Initial
 40 hours - Site Worker

Class Size: 16 attendees max.

Certificate: 1 year expiration

Description: The Hazardous Waste Operations and Emergency Response Standard (HAZWOPER) applies to five distinct groups of employers and their employees. This includes any employees who are exposed, or potentially exposed, to hazardous substances - including hazardous waste - and who are engaged in one of the following operations: clean-up operations, corrective actions for RCRA sites, voluntary clean-up operations, operations involving hazardous waste, and emergency response. *OSHA 1910.120, EPA 40 CFR 264 & 265 Weinstein Safety Consulting, LLC Provided Curriculum*

Heavy Equipment - Mini Excavator Operator

Delivery: In Person
 Duration: 4 hours - Refresher
 16 hour - Initial Operator
 Class Size: 4 people per vehicle - 16 attendees max.
 Certificate: 2 year expiration

Description: This class includes learning about many safety related issues, the machine safety features and devices, and the location and function of all warning systems. It also includes the operations and maintenance for the machine you are operating. The attendee will perform practical operation of the equipment in preparation for production.

Heavy Equipment - Skid Steer

Delivery: In Person
 Duration: 4 hours - Refresher
 16 hours - Initial Operator
 Class Size: 4 people per vehicle - 16 attendees max.
 Certificate: 2 year expiration

Description: This course will discuss the design, carrying capacity, operations and safety features of the Skid Steer. This presentation will show variations of the skid steer loaders that are currently used in the industry. The attendee will perform practical operation of the equipment in preparation for production.

Job Hazard Assessment & Evaluation (JHA)**

Delivery: In Person

Duration: 4 hours

Class Size: 24 attendees max.

Certificate: 2 year expiration

Description: This course discusses the importance of site assessments and the Job Hazard Assessment process. Step by step JHA development and understanding of site assessments tool and documents. Based on the principal that all hazards can be identified for the safe and well-being of employees, and the jobsite efficiencies through task assessment.

NFPA 70E - Electrical Safety (2024 Edition Overview)**

Delivery: In Person

Duration: 8 hours

Certificate: 2 year expiration

Description: This course educates attendees on methods used to identify the shock and arcfash 'hazards' and 'risks' associated with electrical energy, and work practices to establish an electrically safe work condition (ESWC). "Incident Energy" and "Limits of Approach" on IE labels, or using the arc flash PPE categories method, along with guidance on selection and use of PPE. Application of a LOTO program along with job safety planning and job briefing requirements to reduce the risk(s) of injury or damage to health from electrical hazards. Updates to the NFPA 70E-2024 edition are reviewed as well.

Overhead Crane & Gantry

Delivery: In Person

Duration: 4 Hours

Class Size: 16 attendees max.

Certificate: 2 year expiration

Description: This four-hour course is tailored for individuals seeking comprehensive knowledge in overhead crane and rigging operations without hands-on practice. It covers a broad range of topics, including responsibilities, inspection and operational tests, crane and rigging safety, and signaling. The emphasis is on theoretical understanding and safety awareness to prevent accidents and ensure efficient crane operations.

Powered Industrial Truck (Forklift)

Delivery: In Person

Duration: 4 hours - Refresher

8 hours - Initial Operator

Certificate: 3 year expiration

Description: The course will identify risks associated with working on, or near, Powered Industrial Trucks (PIT) and assist employers and operators to eliminate, reduce or control PIT hazards in their workplace. Certificate for Initial Operators will only cover the class and type of PIT at the time of evaluation. OSHA 1910.178

Service Crane Truck

Delivery: In Person
 Duration: 4 Hours
 Class Size: 16 attendees max.
 Certificate: 2 year expiration
 Description: This comprehensive training course is designed for individuals responsible for operating and managing service truck cranes. Focused on safety, operational procedures, and effective communication, the course combines theoretical knowledge with practical applications to ensure safe and efficient crane operations in the field. Participants will learn to navigate the complexities of load management and emergency protocols through interactive case studies and hands-on demonstrations.

SPRAT ** (Society of Professional Rope Access Technicians)

Delivery: In Person
 Duration: 5 days
 Certificate: 2 year expiration
 Description: 5-day course - 4 full training days plus 1 evaluation day, with an optional 6th practice day for more rope time. Level I: Core rope access skills, safety systems, rescues, rigging fundamentals. Level II: Advanced maneuvers, complex rescues, supervised rigging, technical operations. Level III: Oversight, advanced rigging and rescues, team leadership, safety compliance. Rope Access Training in accordance with the Society of Professional Rope Access Technicians (SPRAT) principles and guidelines. *ARS provided curriculum.*

Temporary Traffic Control**

Delivery: In person
 Duration: 4 Hours
 Class Size: 24 attendees max.
 Certificate: 2 year expiration
 Description: This course is an awareness course for work zone safety and application of the five zones outlined in the MUTCD Part VI when working in the right of way. Specific barricade, sign, and high-visibility applications with safe practices for roadway workers. *Manual of Uniform Traffic Control Devices Part VI*

Trench & Excavation Safety**

Delivery: In Person
 Duration: 4 hours - Awareness / 8 hours - Competent Level
 Class Size: 24 attendees max.
 Certificate: 2 year expiration
 Description: This training course is designed to prepare employees to evaluate hazards related to trenches and excavations, evaluate soil mechanics, and select the appropriate protective system. For Competent Persons authorized by their employers to evaluate and protect excavations from failure. In Person 8-hour course can incorporate live demonstrations or practical setup on site.

SAFETY SOLUTIONS
PROACTIVE.PROTECTION.PARTNERSHIP

Professional Respirator Fit Testing

OSHA's respirator standard requires employers to establish and maintain an effective respiratory protection program and when employees must wear respirators to protect against workplace hazards. Different hazards require different respirators, and employers are responsible for providing the appropriate respirator and complying with the respiratory protection program, including annual fit testing.

P3 Safety Solutions now offers Qualitative (QLFT) and Quantitative (QNFT) respirator fit testing. We have the latest negative-pressure technology for quantitative fit testing. We can test your employees faster and more accurately. In your facility or in the field, P3 Safety Solutions can conduct fit testing in any environment. *OSHA's respirator standard 29 CFR 1910.134*

Professional Fall Protection Anchor Proof Testing & Certification

P3 Safety Solutions now offers fall protection anchor proof testing and certification. Our qualified fall protection specialist will pull test anchors to verify and certify compliance with manufacturer anchors installation and OSHA requirements. Contact us for more information. *OSHA 1910.66 APP C, 1926.502*
